Subject: Recommendation for Vojtěch Brtník

To Whom It May Concern:

I am full professor at the Department of Algebra, and the main coordinator of the Master study program named *Mathematical Methods of Information Security* (MMIS) at the Faculty of Mathematics and Physics, Charles University in Prague.

I am writing this letter of recommendation for Vojtěch Brtník, who I believe would be a great asset to your university. Vojtěch Brtník is a student of the MMIS program. During his undergraduate and post-graduate studies he has attended several courses that I either taught personally or whose teaching I have coordinated. Currently I am supervising his master thesis. Vojtěch also helped me to write lecture notes to one of the core courses of the study program. His results were always excellent. Moreover, Vojtěch's general knowledge and interest in the field is significant.

I fully support his decision to spend a semester as an exchange student at Macquarie University while completing his master thesis, and continuing to supervise him during his time at your university. I am convinced that such a stay will highly improve the quality of the thesis. The course units for the stay were selected together by Vojtěch and me, and perfectly match and complete his study plan at our faculty.

For those reasons I am sure that this program is a good choice. It is my pleasure to highly support Vojtěch's decisions and recommend nominating him for the exchange program and possibly for a supporting stipendium.
